

Project Folder Structure

Please maintain following folder structure for maintaining project documents in local machine and central repository (SVN).

Project Name *(Root Folder)*

- **Project Management** *(sub folder) {It will contain following sub folders}*
 - Tender & TOR
 - Work Order & Proposal
 - Estimation records *(it will contain Pre-Sale Estimation and Re-estimation)*
 - Project Kick-off *(it will contain internal & external kick-off meeting records)*
 - Plans *(It will contain Org-level PMP and Project Management Plan)*
 - Change requests
 - Project status reports
 - Tracking records
 - MoM
 - Approval emails *(It will contain important approval emails)*
 - Customer letters
 - Customer feedbacks
 - Completion certificates
 - Travel requests
 - Project closure

- **Engineering** *(sub folder) {It will contain following sub folders}*
 - SRS records *(It will contain SRS document and SRS review report)*
 - Risk Register
 - UI design
 - Images and wireframes
 - HTML prototype
 - HTML review records
 - Approved UI design
 - Technical design document *(It will contain TDD document and TDD review report)*

- Code Review records
- Unit testing records
- QC testing records
- UAT records
- Requirement Traceability Matrix records (RTM) *(It will contain all phases RTM document)*
- Security audit records *(It will contain Security Audit Report and Certificate)*
- STQC records *(It will contain STQC records)*
- Release notes
- User manual
- **Miscellaneous** *(sub folder) {It will contain following sub folders}*
 - Internal Audit reports *(It will contain monthly project audit reports and audit checklists)*
 - High Maturity records
 - Metric sheet *(It will contain monthly Metrics sheet)*
 - PPMs *(It will contain Process Performance Model documents)*
 - CAR *(It will contain Causal analysis & resolution documents)*
 - Configuration management
 - DAR records
 - Reusable component details
 - Server details
 - Staging server
 - Development server
 - Production server

Note:

Following points are applicable for version-controlled repository tool (SVN).

1. **Only allowed team members should have access on a project folder as per requested access rights.**
2. **Project managers should have rights to add more folders/sub-folders in above structure of their own projects.**

3. **Above structure is only for maintaining project documents. Source code is already being stored in separate version-controlled repository.**
4. **Following members should have VIEW/READ rights on all project folders of E-Governance division-**
 - a. Manoj Nagpal (HOD, SEPG Head)
 - b. Manish Singla (SEPG Manager)
 - c. Deepshikha Bharti (SQA)
 - d. Amit Bhagat (QC Lead)
